

# Arena Light Panels

# Arena Light Panels

The light and pedestrian friendly solution among heavy-duty ground protection systems

<b>Material:</b>	Strand-cast aluminum
<b>Dimensions (l x w x h):</b>	2.098 × 3.078 × 0.035 m (82.598 × 121.181 × 13.77 inches)
<b>Weight:</b>	Approx. 143 kg per Panel (315 pounds)
<b>Surface:</b>	Slightly profiled, pedestrian-friendly surface with fully retractable connecting screws
<b>Color:</b>	Silver
<b>Accessories:</b>	Geotextile or EnkaMat
<b>Additional Information:</b>	Passable for vehicles with up to 12 t (26455 lbs) axle load
<b>Transport:</b>	170 Arena Light Panels per 13.60 m tarpaulin / tautliner Approx. 1,105 m <sup>2</sup> (11,894 ft <sup>2</sup> )

## Applications

Arena Light Panels are custom-designed by eps for use in stadiums and other large-scale venues that require accommodating heavy equipment and large crowds. The sturdy aluminum panels provide optimal weight distribution and can withstand the heaviest loads. Unlike other heavy-duty ground protection systems, Arena Light Panels are lightweight and pedestrian-friendly, enabling manual installation. Modern panel laying machines with vacuum technology guarantee quick and efficient installation.

## Features

Special internal connectors connect each Arena Light Panel to the adjoining ones on all sides, creating a completely even surface. The floor protection system features countersunk bolts and is easy to drive and walk on. Additionally, the textured surface of the aluminum panels prevents slipping in wet conditions.

Special ramps ensure smooth transitions between the floor covering and the covered substrate. Arena Light Panels seamlessly join with several turf protection systems from our offerings. Although capable of supporting heavy loads, the panels are compact and lightweight, making them easy to install manually with the help of a forklift. We recommend our semi-automated installation method that utilizes vacuum technology. Arena Light Panels can be transported using regular semi-trailers and standard 40-ft sea containers.

## Optional Extras

We can arrange the delivery and installation of our Arena Light Panels at your request. For added substrate protection, you can choose between EnkaMat or Geotextile.

**01** Our semi-automated installation machines can install Arena Light Panels quickly, safely, cost-effectively, and sustainably | **02** Lift, place, screw, and you're done | **03** Our pedestrian-friendly heavy-duty panels can cover entire stadium fields like at Deutsche Bank Park in Frankfurt am Main, Germany | **04** With stable connections and countersunk screws, our panels create surfaces free of tripping hazards
