| <b>Material:</b>               | strand-cast aluminium                                                              |
| <b>Dimensions (l x w x h):</b> | 2.15 x 3.00 x 0.048 m<br>(7 ft 1 in x 9 ft 10 in x 2 in)                           |
| <b>Weight:</b>                 | approx. 190 kg (419 lbs) per panel                                                 |
| <b>Surface:</b>                | slightly textured, pedestrian-friendly surface with fully retracted nuts and bolts |
| <b>Accessories:</b>            | geotextile or EnkaMat®<br>usable for vehicles up to 12 t axle load                 |
| <b>Transport:</b>              | approx. 806.25 m <sup>2</sup> (8,678 ft <sup>2</sup> )<br>125 panels per truck     |

## Applications

The Arena Panel system has been custom designed by eps for use in stadiums and other large-scale venues that need to accommodate both heavy equipment and large crowds. The sturdy aluminium construction and optimal weight distribution allow the Arena Panel system to withstand even the heaviest of loads. Unlike other heavy-duty ground-protection systems, Arena Panels are also pedestrian friendly and due to their lightweight construction, can be manually installed.

## Features

Each Arena Panel attaches to the adjacent panels on all sides using special internal connectors, creating a completely even surface and ensuring the best possible weight distribution. The system also features counter-sunk bolts, special trip-proof ramps, and a textured surface to prevent slipping in case of

inclement weather. In addition, Arena Panels can be joined seamlessly with our other turf protection systems, such as Terraplas and Rollaway. Despite having the ability to support the heaviest of loads, the panels are also compact and light enough that they can be quickly and easily laid manually, with the help of a forklift. What's more, they can easily be transported to site using regular semi-trailers and standard 40-ft sea containers.

## Optional Extras

eps also offers delivery and installation. If you require an even greater level of subsurface protection, we can also supply EnkaMat® or geotextile.

**01** Arena Panels provide the perfect access road for heavy-duty vehicles in Modena Park, Italy | **02** Safe and robust access for forklift trucks | **03** Trip-free and pedestrian-friendly – at the Openair Frauenfeld festival, Switzerland | **04** Recessed screws and a light surface profile make the panels a safe, trip-free base in public areas
