# eps Pro

Plastic ground protection for medium loads in sensitive areas

<b>Material:</b>	polypropylene copolymer
<b>Dimensions (l x w x h):</b>	2.263 x 1.129 x 0.027 m (89 x 44.5 x 1 in)
<b>Weight:</b>	16 kg (35 lbs)
<b>Color:</b>	grey RAL 9002
<b>Transport:</b>	40 sheets per (euro) pallet 2,240 m <sup>2</sup> (24,111.16 ft <sup>2</sup> ) per standard trailer

## Applications

eps Pro is a temporary turf protection system for sensitive surfaces.

## Features

eps Pro is slightly perforated, allowing UV light, air and water to permeate the ground below. Depending on the ground conditions, eps Pro can be left down for up to five days without damaging the underlying turf and soil. eps Pro comes with a patented locking clip system. Due to special connectors between each element, eps Pro remains flexible and can adapt to slightly uneven surfaces. No special tools are required for disassembly.

## Optional Extras

eps also offers delivery, installation, breakdown, and cleaning. Upon request, we can also supply specialist ramps (in either red or grey), to complete the system.

**01** eps Pro floor tiles are suitable for the protection of stadium and golf turf | **02** Designed for medium-heavy loads, they can be used to create safe pedestrian and spectator areas | **03** The elements made of polypropylene copolymer, are light, water and air-permeable | **04** The lightweight floor covering system protects sensitive green areas for up to five days
