

EVENT CONTAINERS AND PORTACABINS

Event Containers and Portacabins

Applications

We offer a variety of sizes and configurations to meet a multitude of requirements, from double-width models suitable for production offices and dressing rooms, to multilevel complexes ideal for construction sites and exhibitions. Whether you require an information desk, box-office booth, gatehouse container, secure storage, artist dressing rooms, comfortable bedrooms or multistory production offices, eps has the right solution.

Features

Event Container and Portacabin modules can be installed individually or can be combined in order to form an entire building or complex. All our systems are highly adaptable; feature rapid and easy installation; and come with power connections, electric heaters, and air conditioning.

We also offer storage containers in lengths ranging from 3 m to 12 m (9 ft 10 in to 39 ft 4 in), as well as a number of ticket booth and gatehouse designs. In addition, a variety of door and window configurations are available.

Optional Extras

- We can also supply a variety of furnishings, from seating, carpeting, and decor to air conditioning and stages.
- eps offers a range of pedestrian and drivable flooring to service all site-access requirements.
- eps offers CAD design to help expedite and optimize the planning process.
