Applications

GIGS Security Line-up Gates ensure safe and controlled public access to high-traffic gatherings of all types, from concerts and sporting events, to film premieres and trade fairs. The system conforms to all relevant international safety regulations.

Features - GIGS Line-up Gate

GIGS Line-up Gates are modular by design and are fully compatible with GIGS stage barriers. All units in the GIGS series can be serially bolted together, guaranteeing safety and stability. The gates are particularly resistant to both frontal and lateral pressure, due to their robust design and construction.

Features - GIGS 1.20 Double Line-up Gate

GIGS 1.20 Double Line-up Gates are dual-function security gates, thanks to an extra broad aperture of 1.20 m (3 ft 11 in), compared to the standard model, and featuring double-sided, built-in ramps, and secure locking doors, meaning they are also suitable as emergency exits. For extremely high-traffic events, we offer GIGS 1.20 with ballasts for even greater stability.

Optional Extras

We also provide transportation, assembly and disassembly. A wider version of the standard GIGS security gate is available to accommodate wheelchairs.

01 GIGS Security Line-up Gates provide secure and controlled audience admission, and are a complementary addition to general security barriers | **02** The system also serves as a visual orientation point for visitors | **03** Crowd management of pedestrian traffic at Rock am Ring, Germany | **04** The GIGS Security Line-up Gate features a spacious 0.5 meter wide passageway
