

LOGIS[®] EVENT GRIP

Logis[®] Event Grip

Ground protection for pedestrianized areas

Material:	colored: polyethylene (PE) black: recycled polyethylene (PE)
Dimensions (l x w x h):	fabricated slabs: 1.00 x 1.00 x 0.022 m (39 x 39 x 1 in) single slab: 0.248 x 0.248 x 0.022 m (10 x 10 x 1 in)
Weight:	7.5 kg/m ² (1.54 lbs/ft ²) per element
Color:	red, green, blue, white, black additional colors available on request
Transport:	50 fabricated slabs of 1 m ² each 50 slabs per (euro) pallet (= 50 m ²)

Applications

Logis[®] Event Grip is a flexible turf and ground protection system for all types of pedestrian access. The system protects pedestrians and event sites from deterioration of walkways and event areas caused by heavy footfall and adverse weather. The modular flooring is offered in a range of colors and can be installed in patterned configurations, even spelling out text or reproducing logos to add a unique impact to event sites.

Features

A simple clipping system allows for a fast, simple install and provides an even surface, to ensure a safe and stable event floor for pedestrians. As the system is constructed of small flexible segments and is available in a range of colors, it can be adapted to any configuration and tailored to suit bespoke requirements.

Logis[®] Event Grip performs well on flat or mildly undulating ground. It is wheelchair accessible and capable of supporting lightweight vehicle movements.

Optional Extras

- eps offers an optional range of underlays to protect the subsurface and adapt to ground conditions
- Transition products to seamlessly connect Logis[®] Event Grip with other ground and turf protection systems
- Compatible with the full eps range of drivable flooring
- Cable Protectors are available to safeguard equipment and pedestrians
- eps offers CAD design to help expedite and optimize the planning process
