

POLICE BARRIERS

Police Barriers

Multi-purpose security barriers for high-traffic events

Material:	galvanized steel piping
Dimensions (l x w x h):	2.00 x 0.94 x 1.10 m (79 x 37 x 43 in)
Weight:	approx. 34.50 kg (76 lbs)
Transport:	25 barriers per rack 10 racks (approx. 500.00 m / 1,804 ft overall length) per standard trailer

Applications

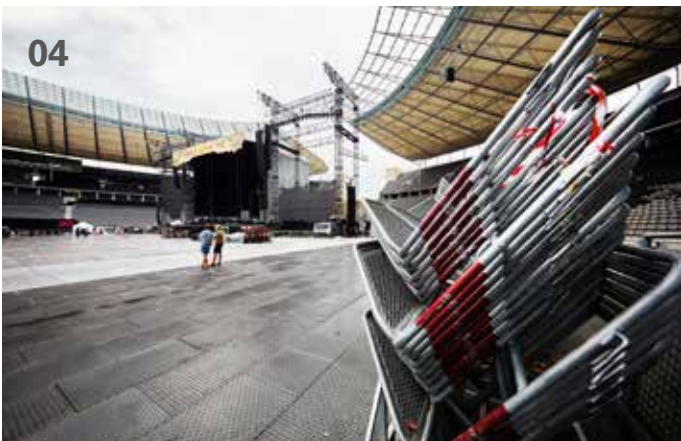

Police Barriers are ideal for securing admission areas at concerts, sporting events, street festivals, and other high-traffic gatherings. They can also be used to fence in entrance areas, section off sales booths, or create spectator pens to safeguard against potentially dangerous crowd surges.

Features

These sturdy interlocking units snap together quickly and easily and are compatible with our mobile fencing, bike racks, and security gates. They are also virtually tip proof as the flat platform base turns into a heavy ballast when spectators stand on it.

Optional Extras

eps also offers delivery, installation, disassembly, and collection. A variety of specialized sizes and shapes are available.

01 Police Barriers are used to safely direct the flow of spectators during a Depeche Mode concert in Cologne | 02 The integrated platform base, which also acts as a tread surface for spectators, leads to greatly increased stability, as seen at a DFB (Germany's national football team) celebration in Marienplatz, Munich, Germany | 03 Police Barriers are used to separate the stage from the audience pit, and can be fitted with covers | 04 Police Barriers are stacked on special transport racks in batches of 25
