Weight:	approx. 4.00 kg per 1.00 m ² (0.82 lbs per 1.00 ft ²)
Color:	light grey or blue
Transport:	up to 3,365.00 m ² (36,221 ft ²) per standard trailer

Applications

Portafloor is a versatile ground-protection system, particularly suitable for protecting turf in football stadiums and other venues from pedestrian and wheelchair traffic.

Features

Portafloor is quick and simple to install. The thin, lightweight panels can be easily transported in large quantities, making it one of the most cost-effective turf protection systems. In addition, Portafloor's ribbed underside allows the grass beneath it to breathe. Portafloor can remain in place for up to three days without causing serious damage to the underlying turf.

Optional Extras

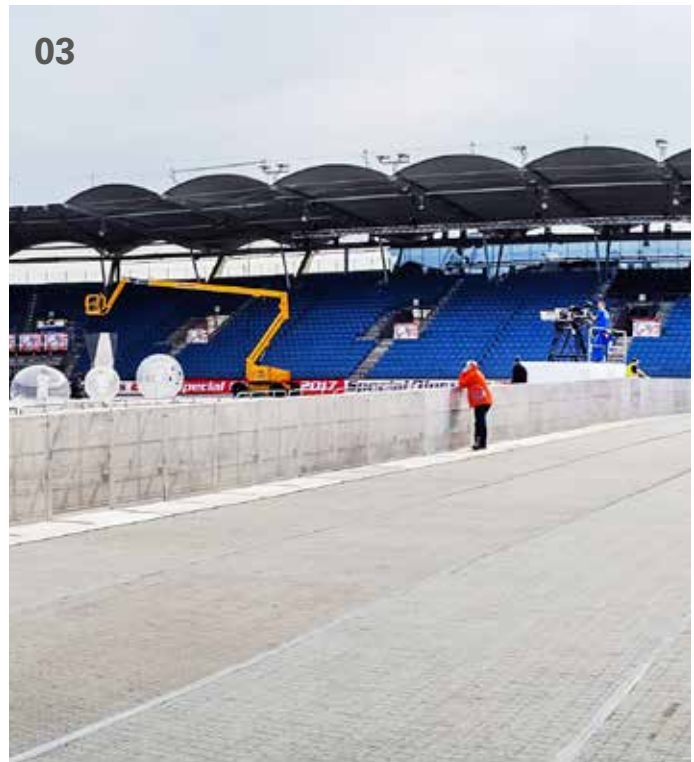

eps also offers a full-service package that includes delivery, set-up, breakdown, and collection.
