<b>Transport:</b>	160 chairs per (euro) pallet (double stacked) 240 chairs per (euro) pallet (triple stacked) 5,200 chairs per standard trailer

## Applications

The Samsonite A chair has been extensively field tested for major events. The weatherproof-steel and high-density plastic construction make it particularly well-suited for outdoor use.

## Features

Samsonite A chairs come with standard PVC chair connectors. Alternatively, we can supply comfort connectors, which increase the space between chairs by 4.50 cm (2 in approx.). Thanks to their space-saving foldable design, 5,200 chairs can be delivered on a single semi-trailer.

## Optional Extras

eps also offers delivery, set-up, and collection. We can provide tailormade cushions, and custom waterproof seat numbers and block signs. We can also provide CAD-based site plans to help you make the most of the available space while meeting safety regulations.

**01** With the help of chair clips, Samsonite A chairs can be connected to form stable rows | **02** Setting up the chairs individually allows for a multitude of arrangements providing separate seating zones | **03** The weather-resistant steel-plastic construction and special rain drainage holes make this model particularly suitable for open-air use | **04** The Samsonite A combines functionality with excellent seating comfort
