

SHOWER CONTAINERS

Shower Containers

The high-quality compact shower solution for event sites

Material:	outer walls and dividers: polyurethane panels floor: ribbed aluminum
Dimensions (l x w x h):	6.00 x 2.44 x 2.50 m (19 ft 8 in x 8 ft x 8 ft 2 in)
Accessories:	wastewater pump trucks
Transport:	2 shower containers with 20 shower stalls per standard trailer

Applications

Our extremely sturdy Shower Containers have been custom-designed by eps for large multi-day events, such as festivals and sporting tournaments. They are particularly well-suited for use in campgrounds and backstage areas.

Features

Each shower container is made up of twelve individual stalls separated by dividers and curtains. To ensure an ample hot-water supply, each container is outfitted with two water heaters with 500 liters capacity per unit. The modules also feature ribbed aluminum flooring and drains, which ensure a dry, slip-proof surface, as well as electric heaters, sinks, and mirrors. Shower containers can be easily unloaded and positioned using a forklift.

Optional Extras

If there is no water supply or sewage system on site, we offer portable solutions, such as holding tanks. We also offer planning, transportation, connection services, and pump-truck disposal, as well as cleaning during and after the event.

01 Each shower container is equipped with wash basins, mirrors, along with electric radiators | **02** Each Shower Container consists of twelve individual shower cubicles, which are separated with partitions and shower curtains | **03** Mobile Shower Containers can be installed in a huge variety of locations | **04** Shower Containers provide an optimal hygiene solution for open-air events lasting several days or other temporary projects
