

# SUPA-TRAC

# Supa -Trac

A flexible turf and ground protection system for all types of pedestrian access

<b>Material:</b>	polypropylene copolymer
<b>Dimensions (l x w x h):</b>	0.91 x 0.225 x 0.035 m per element (36 x 9 x 1.4 in) 2.745 x 1.145 x 0.035 m per unit (cover) (108 x 45 x 1.4 in) 2.80 x 1.195 x 1.17 m per palette (loading) (110 x 47 x 46 in) 2.50 x 1.20 x 0.12 m (palette size) (98 x 47 x 5 in)
<b>Weight:</b>	2.18 kg (4.8 lbs) per element 32.70 kg (72 lbs) per unit
<b>Color:</b>	white
<b>Transport:</b>	94.29 m <sup>2</sup> per special palette approx. 1,508.64 m <sup>2</sup> per standard trailer

## Applications

Supa-Trac is a temporary pitch covering system for protecting football fields, golf courses, and other sensitive surfaces.

## Features

Supa-Trac is slightly perforated, allowing light, air and water to reach the ground below. Depending on the type of ground, Supa-Trac can be left in place for up to five days without damaging the underlying turf and soil. Supa-Trac comes with a patented locking system. To disassemble, all that is required is a standard screwdriver, for unlocking the sections. Thanks to special connectors between each element, Supa-Trac flooring is flexible and can adapt to slightly uneven surfaces. One Supa-Trac unit consists of 15 elements, that can be quickly and easily laid by teams of two.

## Optional Extras

eps also offers delivery, installation, dismantling, cleaning, and collection. Upon request, we can also provide panels in non-standard sizes, and supply yellow or black ramps.

**01** Supa-Trac is supplied in pre-fabricated layers of 15 which facilitates rapid installation | **02** The turf protection system is ideally suited for open-air concerts, stadiums or other large events with high spectator numbers | **03** Depending on weather conditions, Supa-Trac can protect turf from external influences for up to five days | **04** Supa-Trac's surface is permeable by light, water and air

**WHEREVER  
YOU GO, WE  
ARE THERE...**
