## Applications

Flagpoles with Powermoon are ideal for displaying vertical flags, decorative banners, advertisements, and sponsorship logos. They can also be used to mark entrances, evacuation routes, restrooms, and other points of interest. Built to a very high standard, flagpoles with Powermoon are particularly suitable for outdoor use. Thanks to a very bright output of 75 000 lumens at just 650 watts, they draw attention to the signage as well as create a low-glare working environment, with the ability to illuminate up to 3,000 m<sup>2</sup> per pole.

## Features

Flagpoles are made of extruded aluminum and have a smooth, coated surface that repels dirt. Each unit comes with a base, a mast cap and an adjustable horizontal rod to suspend flags or banners from, as

well as guide rings and flag weights to hold flags in place. For added stability, the base features four adjustable feet.

## Optional Extras

eps also offers delivery, installation, breakdown, and collection.

**01** A Flagpole with Powermoon illuminate advertising and orientation aids together with their surroundings | **02** Ideal for marking sanitary facilities at open-air events | **03** The Flagpole with Powermoon also serves as an advertising medium with excellent visibility | **04** Thanks to its high visibility, it creates ideal remote signalling to highlight special meeting points such as paramedic areas
