

GIGS[®] Straight

GIGS Straight

The foundation for pressure-stable and flexible barricade lines

	Standard	Half Standard
Material:	Aluminum	Aluminum
Dimensions: (l x w x h)	1.09 x 1.25 x 1.18 m (43 x 49 x 46 in) Tread: 0.75 m (30 in)	0.54 x 1.25 x 1.18 m (21 x 49 x 46 in) Tread: 0.75 m (30 in)
Weight:	41 kg (90.4 lbs)	21 kg (46.2 lbs)
Color:	Silver (aluminum) or Black	
Load Bearing Capacity:	5 kN / linear meter in the horizontal direction	
Loading Capacity:	10 / 20 standard units per transport rack Approx. 36 transport racks per standard trailer (Approx. 390 m / 1,280 ft overall length)	

Applications

GIGS Straight barricades provide heavy-duty protection for stages, mixers, and follow-spot positions. They can also be used to segregate large audiences in order to safeguard against potentially dangerous crowd surges.

Features

The GIGS range of products consists of a sturdy, modular design. Standard units can be bolted together and/or combined with GIGS security gates, as well as specialized elements to accommodate unusual stage configurations and cable runs. eps also offers a range of components that transform basic GIGS units into sturdy, practical food and beverage stalls. GIGS barricades have been load tested and comply with all relevant international safety regulations.

Optional Extras

eps also offers delivery, installation, breakdown and collection, along with CAD-based site plans, to optimize events of all sizes.

01 Straight barricades are an essential element of crowd control at large events, such as Vainstream Festival in Münster. | 02 Barricades are used as high-density crowd splits to protect people and equipment, backstage, onstage and front of house | 03 Curves and non-standard formations are no problem thanks to GIGS Special Elements | 04 GIGS Barriers provide security and assist with crowd control
