

Mobile Urinals

Mobile Urinals

Portable urinal troughs for outdoor events

Material:	Trough and backsplash made from stainless steel
Dimensions:	Length: 3 m (9 ft 10 in)
Accessories:	Fence covers for privacy protection; basins can also be pre-mounted on fencing panels
Loading Capacity:	8 transport racks with 4 urinal troughs per 3.00 m (9 ft 10 in) of standard trailer Equivalent to 640 urinal spots per standard trailer

Applications

Our extremely sturdy urinals have been custom-designed by eps for large, multi-day events, such as festivals and sporting tournaments. They are particularly well suited for use in campgrounds and backstage areas.

Features

Each unit consists of five individual urinal stations. Urinal units can be mounted on ordinary fencing panels, allowing them to stand apart from other restroom facilities. Made of stainless steel, urinal troughs are both weather resistant and vandalism-proof.

Optional Extras

If there is no existing water supply or sewage system on-site, we can provide portable solutions, such as holding tanks. We also offer planning, transportation, connection services and pump-truck disposal, as well as cleaning during and after the event.

01

01 Urinals allow simultaneous use by multiple event-goers | **02** Mobile Urinals can be quickly erected in a multitude of scenarios, and are a must for any large outdoor event | **03** The channel-shaped basin is three meters long and provides adequate space for five people. The channel and splash guard are made of high-quality stainless steel | **04** Furthermore, its robust and stable nature protects it from damage
