

PVC Traffic Barriers

For temporary traffic guidance

Material	polyethylene
Dimensions (l x w x h)	125 x 35 x 50 cm (4 ft 1 in x 14 in x 20 in)
Weight	7.5 kg (16,53 lbs) (empty weight)
Color	red and white
Accessories	reflectors (standard)
Transport	on pallets

Applications

PVC scrape boards are ideal for temporary traffic guidance and flexible lane design. They are used at sports and promotional events, major events, airports or construction sites.

Features

With their red and white colouring, the guide wall elements achieve a high signal effect. Standard reflectors additionally enhance the effect even in darkness. The individual elements are simply and firmly connected to each other by a plug-in system. As a flexible link chain, eps PVC shelves can be angled up to 90°. Thus they adapt easily to streets and secure obstacles individually.

When empty, the individual elements can be transported and erected quickly and easily. Filled with water they get a very high stability. This makes them suitable for both short-term and long-term use as guide elements.

Optional Extras

On request we offer delivery, installation, dismantling and cleaning. Especially for use in public road traffic, we also offer concrete versions and in different heights if required.

PVC Traffic Barriers

Marking of roads and obstacles, Opera for All, Max-Joseph-Platz, Munich

Temporary changes to the road system

Safe separation of roadway and public area for outdoor events

PVC shelves palletized in a space-saving and safe way and ready for transport

Reliable traffic guidance system with coloured signal effect
