Professional turf protection for light to medium loads

<b>Material:</b>	High-density polyethylene
<b>Dimensions (l x w):</b>	Per sheet: 12.00 x 2.40 m (39.37 x 7.87 ft)
<b>Weight:</b>	12.80 kg/m <sup>2</sup> (2.82 lbs per ft <sup>2</sup> )
<b>Color:</b>	White
<b>Additional Information:</b>	Non-slip and weather-resistant
<b>Transport:</b>	Approx. 1,500 m <sup>2</sup> (16,145.87 ft <sup>2</sup> ) per 13.60 m trailer

## Applications

Rollaway is a grass protection system designed for light to medium loads. It is primarily intended to protect sensitive grass surfaces found in locations such as football stadiums, parks and gardens, or equestrian arenas.

## Features

Equipped with small holes and a slat profile, Rollaway ensures even distribution of weight while allowing sufficient water and oxygen to reach the covered grass. The grass protection is suitable for car parking and can withstand heavy cases, as well as small stages or stands. Depending on weather conditions, the grass can remain covered for several days without damage. The roll material is supplied with longitudinal connectors as standard, allowing the sections to be connected along the length and serving as expansion joints.

## Optional Extras

Our knowledgeable supervisors oversee the installation on-site. Upon request, we also offer full service and take care of all tasks including delivery, installation, and dismantling.

03

01 By simply unrolling Rollaway, a safe event surface is created, protecting sensitive green areas | 02 The turf protection prepares audience areas for large crowds, as seen here before an R.E.M. concert at Oslo's Ullevaal Stadium | 03 Rollaway provides a solid foundation for the front-of-house (FOH) or other structures | 04 The individual sections feature a slat profile, as seen here during work at the Deutsche Bank Park in Frankfurt am Main, Germany
