## Applications

FORIS Security Line-up Gates ensure safe and controlled public access to high-traffic gatherings of all types, from concerts and sporting events, to film premieres and trade fairs. The system conforms strictly to all relevant international safety regulations.

## Features

FORIS Security Line-up Gates can be easily and securely joined with temporary fences, bike racks, and police barricades. They are extremely stable and particularly resistant to frontal pressure, thanks to their robust weight and sturdy design.

## Optional Extras

A broader version is also available to accommodate wheel-chair users. The FORIS system also features optional bag-check tables. eps also offers delivery, installation, breakdown and collection.

01 FORIS Security Line-up Gates ensure safe and orderly entry to events | 02 Gates provide problem-free entry points for events, as seen at Hardsummer Festival 2016 | 03 The wheelchair-accessible entrance gate, combines the user's weight with the structure's own weight, in order to provide an extremely stable entrance | 04 Staff are able to expedite easy access controls, such as ticket and bag checks, with the FORIS separation system
