

# Matrax® Panels

# Matrax Panels

The robust and lightweight solution for optimal load distribution and turf protection

<b>Material:</b>	Polyethylene (HDPE)
<b>Dimensions (l x w x h):</b>	1.12 x 1.12 x 0.038 m (44 x 44 x 1.5 in)
<b>Weight:</b>	Approx. 21.50 kg (47.5 lbs) per panel
<b>Surface:</b>	Slightly textured
<b>Color:</b>	Transparent and Grey
<b>Accessories:</b>	Ramps for smooth vehicle access, PE foil, geotextile
<b>Transport:</b>	16 Pallets à 50 panels per standard trailer Approx. 992 m <sup>2</sup> (10 677.80 ft <sup>2</sup> )

## Applications

With Matrax Panels, temporary pedestrian walkways can be created as well as roadways for construction vehicles. Thermoplastic design makes the ground protection system a lightweight but durable solution, ideal for use on natural or artificial turf.

## Features

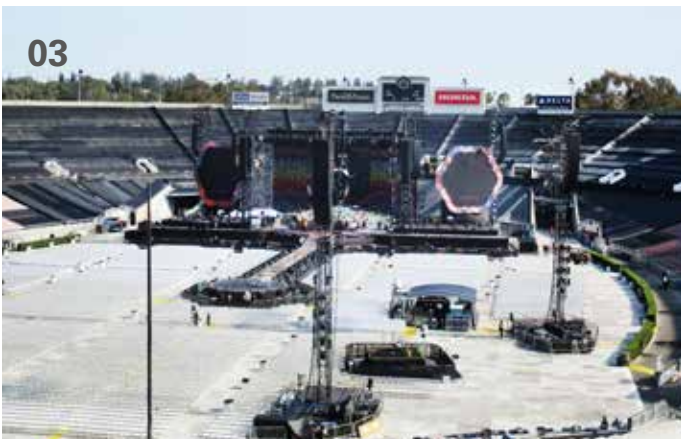

Matrax Panels are exclusively made from recycled and reusable materials and feature a textured surface. Additionally, each ground plate has an integrated interlocking system to hold the mats securely in place. Installation and removal and light tools.

## Optional Extras

Upon request, we take care of delivery, installation, breakdown, and final cleaning. Optionally, we offer Geotextile (nonwoven fabric) for additional protection of the underlying surface under extreme conditions.

**01** Concert preparations in the stadium: The thermoplastic plastic design makes Matrax Panels a lightweight and robust solution, ideal for use on natural or artificial turf | **02**The ground protection made from 100 percent recycled materials is accessible by construction vehicles | **03** Matrax Panels create stable surfaces from parking areas to stage foundations | **04** Additionally, Matrax Panels provide wheelchair-accessible ramps, and each non-slip plate has an integrated locking system that keeps the plates in place
