Applications

Our extremely sturdy Portable Sink modules have been custom-designed by eps for events in venues with limited restroom access.

Features

Our standard sink module features 40 wash stands, each of which is accessible from both sides. A smaller model with four stands is also available. All modules feature sturdy steel fittings and a fold-down 0.80 m (2 ft 8 in) wide slatted wooden platform for users to stand on, which ensures that water runs off quickly and prevents slipping. The sink modules can easily be loaded and positioned with a forklift.

Optional Extras

eps also offers planning services, delivery, hook up, waste disposal, cleaning and collection. We can also supply detachable mirrors and soap dispensers. If there is no existing water supply or sewage system at your event site, we offer portable solutions, such as holding tanks and waste disposal via pump truck.

01 For hand-washing and teeth brushing, etc, this highly stable sanitary unit is perfect for large open-air events | **02** Portable washbasins can be set-up and dismantled quickly and easily, making them ideal for temporary events | **03** Excellent hygiene and comfort for event-goers | **04** The standard model is equipped with two extra-long washbasins accessible from both sides with a total of 40 taps
