

Concert Touring Equipment

Concert Touring Equipment

Mobile supply in catering and backstage areas

Applications

We offer professional-level Concert Touring Equipment for catering and backstage areas. The mobile equipment, ranging from fans to refrigerators, is housed in convenient cases. The devices and utensils are optimally protected from damage in the transport boxes with wheels, making them easy to load and transport by hand.

Features

Sturdy stainless steel sinks, including a variant with two sinks and a large draining area, offer ample space for washing large quantities of dishes. They are equipped with a water heater and standard fresh water and wastewater connections. Refrigerators and freezers, available in various sizes and equipped with temperature control, interior lighting, and a

defrost water drain, provide sufficient storage space for food and beverages. Reliable fire extinguishers that meet current standards are also indispensable at any event. We carry carbon dioxide extinguishers (CO2 fire extinguishers) for Class B fires as well as powder extinguishers for Class A, B, and C fires. Adjustable stand fans ensure cooling on hot summer days.

Additional Concert Touring Equipment includes:

- First-aid kits, equipped according to current standards
- Cable, cable drums and adapters
- Waste bins, brooms and much more
- Consumables such as cable straps and gaffer tape
