

ArmorDeck 3

The drivable ground protective system for medium-heavy loads

Material	high-density polyethylene (HDPE)
Dimensions (l × w × h)	overall dimensions: 1.15 × 1.15 m (45.3 × 45.3 in) working dimensions: 1.07 × 1.07 m (42 × 42 in) height: 0.05 m (1.9 in)
Weight	approx. 19,50 kg per piece (43 lbs)
Surface	sand-blasted non-slip surface with a flat profile and traction nubs
Accessories	ramps
Color	dark green, light grey; custom colors available
Transport	45,6 m ² (490.83 ft ²) per pallet approx. 1,003 m ² (10,796.20 ft ²) per standard trailer

Applications

ArmorDeck 3 protects natural and artificial turf as well as surfaces such as asphalt or sandy ground. The system is suitable both for pedestrian traffic and as a sub-flooring for grandstands, towers or stages. Now in its third generation, ArmorDeck 3 reliably withstands loads such as forklifts or trucks. It is well suited for both audience and backstage areas.

Features

ArmorDeck 3 is a ground protective system designed to meet your highest expectations. The integrated connection system locks firmly to permit secure assembly, as well as maximum stability and surface protection. ArmorDeck 3 is made of polyethylene (thickness: 5 cm (1.9 in) and remains stable during all weather conditions and loads. Along with the light duty system ArmorDeck 1, ArmorDeck 3 creates a gap-, transition- and trip hazard-free surface for events requiring heavy plant for construction and dismantling of structures like stages and towers (Armor Deck 3), combined with audience areas which protect the natural turf below (Armor Deck 1).

Optional Extras

Upon request, we can provide comprehensive quotes including shipping, assembly, disassembly, and final cleaning. For especially heavy loads or for additional protection, we recommend the use of an additional fabric such as geotextile.

ArmorDeck 3

On-site applications

ArmorDeck 3 used as stadium-turf-cover for-a major event

ArmorDeck as under-stage flooring

As flooring for seating in the public area

ArmorDeck 3 protects both natural and artificial surfaces

Easy to drive on with production vehicles
