Material	polypropylen with UV stabilizer
Dimensions (l × w)	0.31 × 0.085 m (12 × 3 in) per element 2.16 × 38.00 m (85 × 1,496 in) standard transport unit in rolls of 82.10 m ² (98.19 ft ²)
Weight	approx. 4.00 kg per 1.00 m ² (0.82 lbs per 1.00 ft ²)
Color	light grey, grey
Accessories	transport trolleys, golf carts
Transport	up to 3,365.00 m ² (36,221 ft ²) per standard trailer

Applications

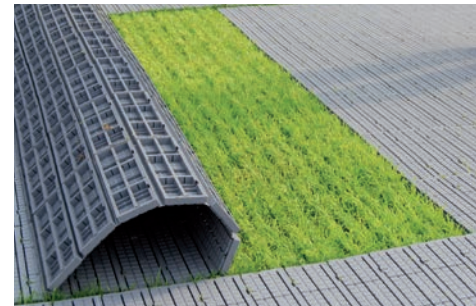

Portafloor is a versatile ground protection system. It is particularly suitable for protecting turf in football stadiums and other venues from pedestrian and wheelchair traffic.

Features

Portafloor is quick and simple to install. And the thin, lightweight panels can be easily transported in large quantities, making it one of the most cost effective turf protection systems. In addition, Portafloor's ribbed underside lets grass beneath breathe. It can stay down for up to three days without causing serious damage to the underlying turf.

Optional Extras

Our expert supervisors will oversee installation. Upon request, we also offer a fullservice package including delivery, set up, and breakdown.
