Transport	160 chairs per pallet (double stacked) 240 chairs per pallet (triple stacked) 5,200 chairs per truck

Applications

The Samsonite A chair is field tested for major events. The weatherproof steel and high-density plastic construction make it particularly well suited for outdoor use.

Features

The chairs come with standard PVC chair connectors. Alternatively, we can supply comfort connectors, which increase the space between chairs by 4.50 cm (2 in approx.). Thanks to their space-saving collapsible design, 5,200 chairs can be delivered on a single semi-trailer.

Optional Extras

Upon request, we offer delivery and set up, as well as tailor-made cushions, and custom waterproof seat numbers and block signs. We can also provide CAD-based site plans to help you make the most of the available space while meeting safety regulations.

Samsonite A
