

eps Pro

A professional turf protection system for medium loads

Material	polypropylen copolymer
Production process	injection-moulding
Dimensions (l x w x h)	2263 x 1129 x 27 mm (89,1 x 44,5 x 1,06 in)
Weight	18 kg (40 lb)
Color	Grey RAL 9002
Dimensions per pallet	2320 x 1190 mm (91,3 x 46,9 in)
Transport	40 sheets per pallet 2240 m ² (24111,16 ft ²) per standard trailer (13,60 m) (44,62 ft)

Applications

eps Pro is a temporary turf protection system for sensitive surfaces.

Features

eps Pro is slightly perforated, allowing UV light, air and water to the ground below. Depending on the ground conditions it can be left down for up to five days without damaging the underlying turf and soil.

eps Pro comes with a patented locking clip system. Due to the special connection between the elements, eps Pro fields remain flexible and can adapt to slightly uneven surfaces. No special tools are required for disassembly.

Optional Extras

We offer delivery, installation, breakdown, and cleaning. Upon request, we can also supply special ramps colored red and gray to complete the system.

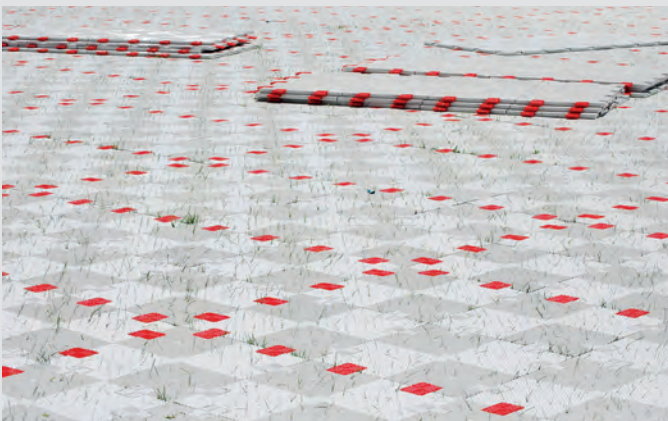

eps Pro

On-site applications

eps Pro is a temporary turf protection system for sensitive surfaces

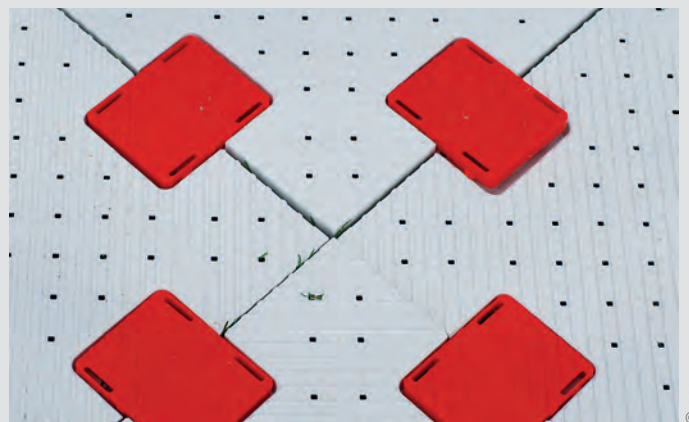

eps Pro is permeable to UV light, water and air

eps Pro allows customized solutions for events

eps Pro was first used on tour with Vasco Rossi in 2016

The eps Pro panels are connected by a patented locking clip system
