

Arena Light Panels

Arena Light Panels

Lightweight heavy-duty panels quickly laid into a firmly closed surface

Material:	Strand-cast aluminum
Dimensions (L x W x H):	2.098 x 3.078 x 0.035 m (82.6 x 121.2 x 1.4 inches)
Weight:	Approx. 143 kg per panel (315 lbs)
Surface:	Slightly profiled, pedestrian-friendly surface with fully retractable connecting screws
Color:	Silver
Accessories:	PE foil, geotextile or EnkaMat
Additional Information:	Passable for vehicles with up to 12 t (26,455 lbs) axle load
Transport:	170 Arena Light Panels per standard trailer Approx. 1,105 m ² (11,894 ft ²)

PRODUCT PROFILE

Arena Light Panels can be securely connected on all sides. This creates level, firmly closed surfaces with a quality that distinctly sets them apart from other ground protection systems. Specially developed by eps for use in stadiums, these aluminum panels provide load-distributing substructures on sensitive grounds for stages and temporary access for heavy equipment. Unlike many other heavy-duty systems, Arena Light Panels are also suitable for spectator areas. A semi-automated installation method using vacuum technology allows for extraordinarily quick installation.

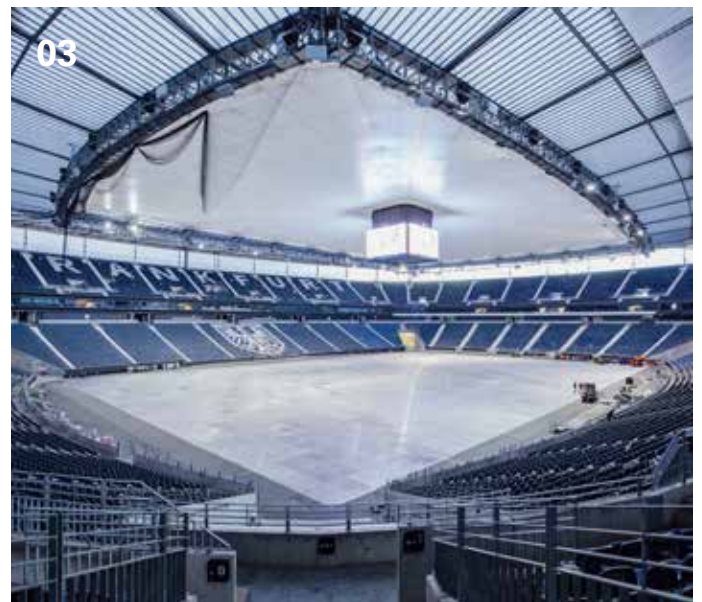

HIGHLIGHTS

- Form-fit and force-locking connections across both axes for level, firmly closed surfaces without any trip hazard, keeping covered substrates clean
- Pedestrian-friendly, lightly profiled anti-slip surface with recessed connection screws
- Comparatively lightweight yet highly stable

- High transport efficiency
- Extremely quick to install with a semi-automated installation technique using vacuum technology or alternatively by hand
- Made from 100% recyclable aluminum

OPTIONAL EXTRAS

- All necessary ramp types for secure transitions to the covered substrate, including ADA ramps for barrier-free access, are also to be securely connected with form-fit and force-locking
- Additional underlays for extra protection of the substrate and better adaptation to ground conditions, such as PE foil, geotextile, or EnkaMat
- Seamless integration with turf protection systems from our range
- Comprehensive services, such as project management, CAD planning, logistics, assembly, and dismantling

01 With semi-automated laying machines, Arena Light Panels can be installed extremely quickly, safely, cost-effectively, and sustainably | **02** Simply lift, place, screw, done | **03** The pedestrian-friendly heavy-duty plates can cover entire stadium fields, as seen here at the Deutsche Bank Park in Frankfurt am Main | **04** Stable connections and recessed screws create surfaces without any tripping hazards
