## Applications

The eps Avenue is used at events of all kinds. As a weatherproof folding chair that can be connected to form rows in no time at all, it is particularly suitable for large open airs. The seating surface is equipped with holes through which rainwater can easily drain away. With simple design, it fits almost any venue.

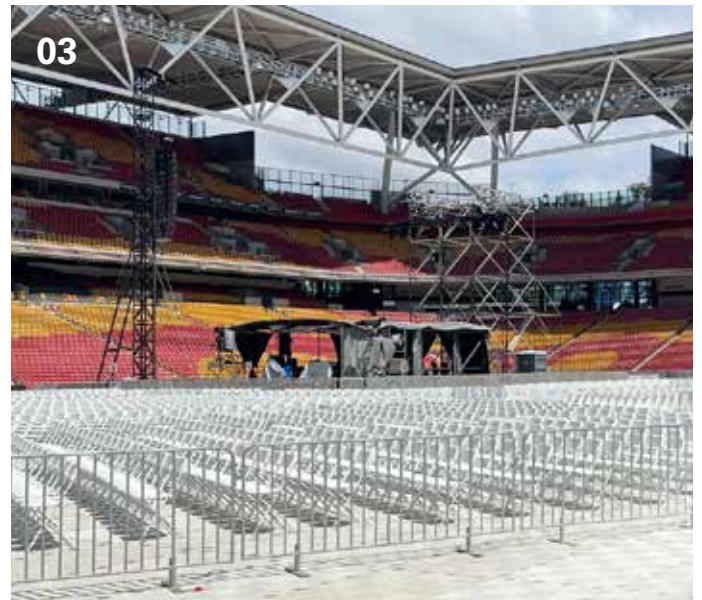

## Features

The eps Avenue has fixed connectors at the top and bottom, through which it can be connected to form sturdy rows of chairs. Simply hook it into place. The integrated connection system significantly speeds up assembly and disassembly. With its ergonomically shaped seat and backrest made of weather-resistant plastic, the lightweight chair offers guests optimum comfort. In addition, as a folding chair, the eps Avenue is space-saving and very transport-efficient.

## Optional Extras

As an option, we offer custom-made, weather-resistant labels including block signage. In addition, on request, we can take care of the planning work and inspection appointments, draw up CAD-based seating plans with the maximum capacities permitted in each case, and take care of official procedures and the handling of local approval procedures. We will be happy to submit an individual offer - whether for pure material rental or including planning, transport to and from the event, supervisor and installation personnel.

**01** Folding chair eps Avenue is weatherproof and is ideally suited for large outdoor events, ensuring the best seating comfort for numerous guests | **02** Creating large-area row seating has never been easier with the eps Avenue's integrated connection system! Simply hook it in at the top and bottom, and you're done, as you can see here before an Ed Sheeran concert | **03** The eps Avenue is space-saving and very transport-efficient | **04** The seat surface of the eps Avenue chair has holes that allow rainwater to drain off easily
