

eps<sup>®</sup> Pro

# eps Pro

## Quick and Easy Ground Protection for Sensitive Areas

<b>Material:</b>	Polypropylene copolymer
<b>Dimensions</b> (l x w x h):	Per sheet (cover dimension): 2.263 x 1.129 x 0.027 m (89 x 44.5 x 1 in)  Per element: approx. 0.562 x 0.562 x 0.027 m (22 x 22 x 1 in)
<b>Weight:</b>	16 kg (35 lbs)
<b>Color:</b>	Light Grey (other colours also possible)
<b>Transport:</b>	22-24 pallets of 40 panels per standard trailer Approx. 2,240-2,452.64 m <sup>2</sup> (24,200-26,400 ft <sup>2</sup> )

### **PRODUCT PROFILE**

eps Pro is a modern, efficient turf protection solution made of plastic and offers reliable protection for sensitive areas. Thanks to the patented click system, the tiles can be installed and removed quickly, easily and without tools. The flexible tiles for medium loads are used at small and large events - for example on stadium turf, golf courses, horse racing tracks or other turf and meadow areas. eps Pro easily levels out unevenness and can be driven over with cases and light vehicles such as club cars or pallet trucks.

### **HIGHLIGHTS**

- Simple, tool-free installation thanks to the patented click system
- Up to 70% faster assembly and disassembly than comparable solutions
- Adaptable, lightweight panels for optimum stability even on uneven surfaces

- Efficient transportation and covering of large areas with minimal effort

### **OPTIONAL EXTRAS**

- Ramps for barrier-free access
- Ramps and clips in various colors
- Underlays for additional protection of the substrate and better adaptation to the ground conditions
- Comprehensive services, e.g. project management, CAD planning, logistics, assembly and dismantling

**01** eps Pro floor tiles are suitable for the protection of stadium and golf turf | **02** Designed for medium-heavy loads, the floor tiles can be used to create safe pedestrian and spectator areas – even on uneven ground | **03** The elements made of polypropylene copolymer, are light, water and air-permeable | **04** The lightweight floor covering system protects sensitive green areas for up to five days
