# GIGS®
IO Gate Pro

GIGS IO Gate Pro

For maximum transparency with contactless controls

Material:	Aluminum and stainless steel
Dimensions (l × w × h):	GIGS IO Gate Pro including two turnstiles: 1.09 × 1.90 × 1.18 m (43 × 75 × 46 in) Standard opening of turnstile system: 0.57 m (22 in) Emergency exit: 1.20 m (47 in)
Weight:	GIGS IO Gate: Approx. 60 kg (132 lbs) Turnstile: 38 kg (84 lbs)
Color:	Silver-gray
Accessories:	Connecting elements
Transport:	5 GIGS IO Gates per dolly 4 turnstiles per case

ⓘ PRODUCT PROFILE

The GIGS IO Gate Pro combines the GIGS IO Gate, a two-arm turnstile, and a scanner from our partner. The automated solution ensures maximum transparency for contactless controls. The modular construction principle offers tailored access solutions. The scanner can be integrated with any common ticketing system and reads all usual access control systems and codes. The turnstile system has two passages and can be transformed into an emergency exit at the push of a button. Since the turnstile also features an emergency exit function, the gate remains emergency exit-compliant. The entry system is suitable for indoor and outdoor events, particularly for stadium shows, for the second security ring at sports events, and for venues with limited escape route capacities. It saves time and personnel, increases spectator capacities, and enables the utilization of new venues.
💡 HIGHLIGHTS

- Maximum transparency and security: The GIGS IO Gate Pro provides detailed, tamper-proof information in real-time
- Automated solution enabling contactless, hygienic access controls and relieving entry and security personnel
- Particularly cost- and resource-saving

🔧 OPTIONAL EXTRAS

- Compatible with all entry turnstiles and barriers from the GIGS series
- Curved connectors that allow the entry turnstiles to be seamlessly bolted together and with GIGS barriers
- Comprehensive services, such as project management, CAD planning, logistics, setup, and dismantling

01 Automated solution and compliant emergency exit at the push of a button: The GIGS IO Gate Pro significantly contributes to event security | 02 The real-time system provides detailed and tamper-proof information | 03 Large audiences and visitor flows can be optimally monitored and controlled with the mobile entry system | 04 Secure barriers guaranteed! The GIGS IO Gate Pro is compatible with GIGS barriers
