Color:	Silver-gray
Accessories:	Final element
Transport:	4 pieces per dolly

PRODUCT PROFILE

The GIGS Turnstile Pro consists of a two-arm turnstile with legs, a mounted scanner (Head Unit) from our partner, and a profiled, non-slip footplate (basement). Compared to similar turnstile systems, it is very lightweight, logistically efficient, and boasts a sleek design. The integrated scanner enables digitized and automated access controls. It can be integrated with any common ticketing system and reads all usual access control systems and codes. In case of emergency, the GIGS Turnstile Pro can be easily activated, and the barrier arm automatically lowers. As a mobile, outdoor-capable entry system, the GIGS Turnstile Pro is suitable for numerous entry situations and events. It is ideal for employee entrances, backstage and catering areas, as well as visitor entrances at trade shows, conferences, and similar events.

HIGHLIGHTS

- Lightweight mobile entry solution for temporary use
- Quick and easy to set up and dismantle manually
- Emergency exit function
- Modular for flexible and tailored access solutions

OPTIONAL EXTRAS

- Final elements
- Comprehensive services, such as project management, CAD planning, logistics, setup, and dismantling
